

Safety instructions for the installation and use of glass, tempered glass and hybrid glass for the device screen

Manufacturer: 3mk Protection sp. z o.o.
Ul. Krotoszyńska 35 B-02 Lok. 4A
63-400 Ostrów Wielkopolski; Polska
3mk@3mk.pl

1. Before starting installation:

- o Make sure the phone surface is clean, dry and free of dust.
- o Prepare installation accessories, such as:
 - Microfiber cloth
 - Dust removal stickers
 - Alcohol wipe (if included in the set).

2. During application:

- o Apply the glass in a clean, dust-free environment to prevent dirt from getting between the glass and the screen.
- o Be careful not to damage the edges of the glass - they may crack under strong pressure or impact.
- o Do not bend the glass - it is resistant to pressure, but may crack when bent.
- o Align the glass precisely with the edges of the screen to prevent it from peeling off.

3. After installing the glass:

- o Avoid excessive pressure on the edges, especially when carrying the phone without a protective case.
- o Check the condition of the glass regularly to make sure there are no chips or cracks. Damaged glass must be replaced immediately to avoid injuring your fingers.

4. Safe use:

- o Tempered glass provides extra screen protection, but it is not indestructible. Drops from a great height or impacts may damage it.
- o Avoid contact with sharp objects that may scratch the glass surface.
- o Do not attempt to remove the glass yourself without appropriate tools, to avoid damaging the phone screen.

5. What to do in case of damage:

- o If the glass cracks, be careful when removing it to avoid cutting yourself on fragments.
- o Dispose of used glass in accordance with local regulations on glass waste.

6. Additional safety measures:

- o It is recommended to use the glass together with a protective case for full device protection.
- o Avoid extreme temperatures, which may affect the adhesive fixing the glass (e.g. leaving the phone in the sun).

Following the above rules will ensure long-lasting and safe use of the glass and effective protection of the phone screen.
